SUMMARY

"Detail-oriented Biotechnology student with comprehensive hands-on training in molecular biology techniques and genetic analysis. Proficient in executing standard laboratory protocols, maintaining precise documentation, and analyzing data using [Software Tool]. Seeking an entry-level Laboratory Technician or Research Assistant role to support innovative biotechnology workflows."

EDUCATION

Bachelor of Science in Biotechnology

University College London (UCL) | Expected

- **Expected Graduation:** May 2028
- **GPA:** 3.8
- **Relevant Coursework:** Molecular Genetics, Immunology, Bioprocess Technology, Bioinformatics

TECHNICAL SKILLS

- **Molecular & Cell Biology:** PCR, Gel Electrophoresis, DNA/RNA Extraction, Mammalian Cell Culture
- **Microbiology & Biochemistry:** Microorganism Isolation, Gram Staining, ELISA, SDS-PAGE Chromatography
- **Analytical Instrumentation:** UV-Vis Spectrophotometers, Light Microscopes, Autoclaves, pH Meters
- **Software & Data Tools:** BLAST, SnapGene, MATLAB, R (Basic), MS Excel (Data Analysis)
- **Compliance:** Good Laboratory Practice (GLP), Biosafety Level 2 (BSL-2) Protocols.

EXPERIENCE

Biotech Intern | University College London |

Sep 2025 – Dec 2025

- Prepared chemical solutions, reagents, and growth media daily for a team of 10 senior researchers.
- Calibrated, sterilized, and maintained critical laboratory instruments, reducing equipment downtime by [X%].
- Audited chemical inventory logs to ensure all hazardous materials complied with institutional safety standards.
