Dear Hiring Manager,

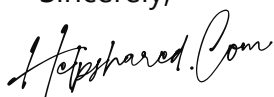

My name is Jamal Keating, and I'm writing to express my interest in the open position of Data Analyst at St. Mercy Hospital. I'm a skilled analyst with over six years of experience in data management for health care organizations. Working for St. Mercy Hospital is an exciting opportunity for me to join an industry-leading health care team and use my skills to improve the health of people in our community.

I've spent most of my career applying data management techniques to help health care administrators improve their patient outcomes. As a Data Analyst at Cromwell Row Cancer Center, I used predictive modeling techniques to analyze vast amounts of patient data and identify areas for improvement. During my time there, I designed and built a new database that reduced data security breaches by 66%. My previous position as a Junior Data Analyst at Victor Hall Hospital taught me skills for IT management at a large-scale health care facility which I can bring to my work at St. Mercy Hospital.

Along with my professional experience, I have strong technical and interpersonal skills that make me an excellent addition to the staff at St. Mercy Hospital. I can code in several languages and use a wide range of data management tools, including Microsoft Excel and MySQL. Last year, I became a Microsoft Certified Solutions Expert in Data Management and Analytics, and I'm eager to continue building my skills with more certification programs and learning opportunities. I'm a strong communicator who believes in the importance of collaboration in IT management.

I've attached my resume to this document, along with a letter of recommendation from Jill Morrison, the former Director of IT at Cromwell Row Cancer Center. Please contact me if you have any questions about my qualifications or professional goals. Thank you for your time and consideration. I look forward to speaking with you soon.

Sincerely,

Ashley Brooke
