

DAVID CARTER

Mechanical Engineer

March 25, 2026

Dear Hiring Manager,

I am thrilled to have this opportunity to apply for a position at Spartan Tech as a full-time Mechanical Engineer. With five years of professional experience as an engineer, I am aware of Spartan's position as a leading designer of inertial sensors, and so look forward to working alongside some of the best talent in the industry. With my Master of Science in mechanical engineering, expertise in lean manufacturing principles and strong engineering competencies, I intend to be a valuable asset to the company.

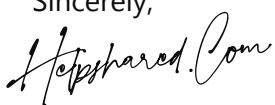

In my current mechanical engineering position at Shu Corporation, I have played an integral role in the development and evaluation of project requirements and designs. Working closely with fellow engineers and other STEM professionals, and members of production personnel, I have helped to develop systems to improve our manufacturing processes. In fact, in my time with Shu, our efficiency has increased by an average of 20%, and our revenue is up 25%.

Such progress comes as a product not only of technical proficiencies in CAD, Python and design principles but also of valuable soft skills, namely communication and teamwork. I believe that such soft skills necessarily complement each other. In my five years at Shu, every major project has involved multiple minds integrating their talents to reach a shared goal. To be successful in our endeavors, we constantly seek one another's input. Thus, I have honed my skills of communication to convey ideas clearly and amicably, and I have long appreciated the varied perspectives that arise from a motivated team environment.

Knowing that Spartan Tech values close collaboration, an amiable work environment and Lean principles, I am eager to join the team and maintain the vigorous culture it promotes. I believe there is a lot I can learn from the experts at Spartan, and I am grateful for the opportunity to make my own contribution and grow alongside the company.

I am also incredibly grateful that you have taken the time to consider me for the full-time Mechanical Engineer position at Spartan Tech. I have included my phone number and email address at the top of this letter and look forward to hearing back from you.

Sincerely,

A handwritten signature in black ink that reads "HelpShared.Com". The signature is stylized and cursive.
